## Region 3

- **Dimock Residential Groundwater Site, Dimock, PA.** ERT continued to assist EPA Region 3 at the Dimock Residential Groundwater Site in Dimock, Pennsylvania. During April, Gary Newhart was on site on April 1-2, 8-12, and 4/10-13, and John Gilbert on April 5-6. The support provided includes on-site groundwater collection, data management, off-site technical guidance, data interpretation and roll-out to residents in the area. Contacts: Gary P. Newhart, 513-470-8662; John M. Gilbert, 513-569-7590]
- **New Cumberland Well Field Site, Cumberland, WV.** On April 17, Don Bussey was in New Cumberland, West

Virginia, assisting the EPA Region 3 On-Scene Coordinator in presenting to the City Council the results of an EPA assessment of the New Cumberland Well Field Site. The New Cumberland municipal well field was found several years ago to be contaminated with VOCs. The EPA assessment was conducted to identify the source(s) of the contamination and to construct a groundwater flow and transport model which was calibrated to known local conditions. During the meeting, Don Bussey described the constructed model, and offered the City Council positive solutions based on the hypothesized model scenarios which the City could consider as it decides on the best course to take. [Contact: Don Bussey, 702-784-8016]
